

Community Environmental Education Presentations

The City of Bryan Environmental Services Department is pleased to conduct educational presentations for local community groups on a variety of important environmental topics. Available presentations include:

Environmental/Solid Waste Services

This presentation highlights some of the lesser known but valuable services offered by Bryan's Environmental Services Division. Do you know where and when you can dispose of your paint and household chemicals for free? Do you know what types or how much brush and bulky you may place curbside? Do you know how to report illegal dumping or other environmental concerns in your area? Find out how you and your family can make a difference in beautifying Bryan!

Water Quality in Your Neighborhood

How do our everyday actions affect the environment? Find out what goes down the storm drains in Bryan as a result of common yard care and home improvement practices and their effect on water quality.

Environmentally Friendly Yard Care

Equip your garage or gardening headquarters with tools and techniques that save you time in the garden and are beneficial to the environment! Discover simple ways to conserve water and to reduce your use of synthetic fertilizers and pesticides.

Litter Awareness

Learn about the effects of litter on public health, property values, taxes, neighborhood crime, vehicle crashes, children's injuries and plant growth. Can litter be controlled? You bet! Learn how.

Why is Recycling Important to YOU?

Think recycling is practiced only by "tree huggers" and environmentalists? Think again. You may be surprised to learn how recycling reaches all of us in unexpected ways and who supports recycling in our community. Schedule this program and learn how recycling can benefit YOU!

Let's Tackle Grease in the Kitchen

Grease and oil come from a number of sources. Some of these sources are not easy to spot, such as food scraps, baked goods, sauces and dairy products. Did you know that putting oil and grease down the kitchen sink can cause costly sewer overflows into streets and storm drains in your neighborhood? Learn how and why you should help prevent grease buildups and blocked sewer lines.
